

HOLBEACH MARSH TRAINING GROUP

Industrial Telescopic Lift Truck (pallet and bulk)

Course Details

Title: Industrial telescopic lift truck (pallet and bulk)

Type: Training Course

Duration: 1 – 5 Days

An industrial telescopic lift truck is a widely used heavy duty machine in the land-based and construction industries. It has a similar appearance and function to a forklift truck, but due to its upwards and forwards reach abilities it is much more versatile.

Our industrial telescopic lift truck (pallet and bulk) integrated training and assessment course runs for one to five days, and will provide you with the appropriate techniques and safety guidelines to ensure that you are confident when using the industrial telescopic lift truck and also make you aware of the relevant health and safety guidelines ensuring that you stay protected and safe.

Who is it for?

Our course is for anyone who uses or will be using an industrial telescopic lift truck in either the land-based or construction industry. The course will allow you to develop the skills and knowledge required giving you the confidence to operate the industrial telescopic lift truck safely and with confidence.

What will you get from it?

Identify the basic construction and components, and the purpose and use of all controls and gauges.
Identify and comply with manufacturers' instructions in accordance with the operator's handbook, other information sources such as load charts and applicable regulations.

Explain all relevant documentation.

Carry out all pre-use and running checks.

Configure the tele-handler for site and road travel.

Travel over differing types of terrain, including rough undulating ground (not applicable for Industrial Telescopic) and substantial inclines, both with and without a load.

Manoeuvre in confined areas using forward and reverse direction, both with and without a load.

Set the telescopic handler in order to lift various loads.

Lift and place various loads within the full working range of the telescopic handler.

Ensure load integrity and security.

Transport loads.

Place and retrieve loads accurately at various places.

Place and retrieve loads from a vehicle bed or trailer.

Keep within safe working parameters.

Place the machine in an out-of-service condition.

Explain the loading and unloading procedure on and off a transporter.

Course sessions:

Working in the construction industry

Specific legislation

Introduction to the lift truck

Working principles of lift trucks

Lift truck stability

Starting and stopping the machine

Basic driving and manoeuvring

Operating with an empty pallet

Undercutting

Assessment of landing zone

What can go wrong

Planning the operation

Risk assessment

Using an assistant (Banksman)

Daily and take-over maintenance checks

HOLBEACH MARSH TRAINING GROUP

Familiarisation with instruments and controls
Starting and stopping the engine
Handling loaded pallets up to a height of 1200mm
Stacking/Destacking loaded pallets at all heights
Loading and unloading lorries and trailers
Difficult loads
Manned platforms
Rough terrain to use
Road work
Attachments
